DIVISION OF
OIL GAS & MINING

Dear Mr. Tetting,

Re: LaSal-Snowball
ACT/037/026

Attached are updated maps and a new bond estimate for the LaSal-Snowball ACT/037/026 amendment request. A 1982 annual progress report is enclosed also. Because of the depressed uranium market, the LaSal-Snowball operations were severely cutback for 1983 and possibly even longer. The current production is less than half that of last year, with only one incline adit and the Beaver Shaft in use.

Current acreage affected is near 38 acres and comprised of the following:

LaSal Incline Site	14.4 acres
Beaver Shaft Site	7.9 acres
Snowball Incline Site	4.2 acres
Beaver Waste Dump	2.8 acres
11 Vent Sites & Roads	4.8 acres
Haulage Road	3.8 acres
	<hr/>
	37.9 acres

I am requesting that this permit be amended for 55 acres of total disturbance, to allow ample room for growth and prevent problems as in the past. As soon as a bond estimate can be agreed upon, it will be handled by our Corporate Offices and should be completed in 30 to 60 days.

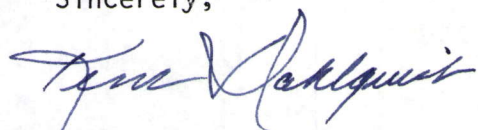

Regarding the test plots agreed upon last year, the various waste materials were trucked to the Beaver waste dump and fenced for fall planting. However inclement fall weather prevented their planting as planned and it is intended that planting will be done this fall in fulfillment of that commitment. The test plot area is shown on the Beaver Waste Dump Map.

Thomas Tetting
LaSal/Snowball - ACT/037/026

Page 2

I hope this and the information enclosed will serve to finalize the amendment request and return this permit to its proper status.

If there are further questions or need for an on site visit, don't hesitate to call.

Sincerely,

A handwritten signature in blue ink, appearing to read "Kent Dahlquist". The signature is fluid and cursive, with the first name "Kent" and last name "Dahlquist" clearly distinguishable.

Kent Dahlquist
Mining Engineer
